

# Test Task

As this project requires a substantial amount of time and effort, we have decided to introduce a test task to assess our potential collaboration in the future. We are seeking a candidate who meets the following requirements:

## Requirements

- Proficiency in React, Next.js, TypeScript, and Tailwind CSS.
- Strong knowledge of best coding practices and design patterns.
- Ability to provide clean code that seamlessly integrates with the existing project structure.
- Proficiency in adhering to basic React patterns, including proper state management through context, and other best practices.
- Ability to work independently and deliver high-quality, maintainable code.
- Excellent communication skills for regular updates and collaboration.
- Fully responsive and tested by yourself in all common browsers (Chrome, Safari and Firefox)

## Task

Your task involves doing your best to recreate the existing Header, Footer, and Sidebar components. For the Contents pages, you should create them but only include a headline. You will be working within a well-documented Next.js project with a clear folder structure and extensive information on how things are done. You can use the current frontend as a reference, along with a detailed Figma board as a guideline. Please read the documentation in the repository and take it into account for the structure of your code.

Considering the existing project's significant deficiencies, it's likely that you may encounter some bugs in the codebase from the old repository. In all instances, please refrain from copying any code. If you're uncertain about the intended functionality, don't hesitate to reach out to us for clarification.

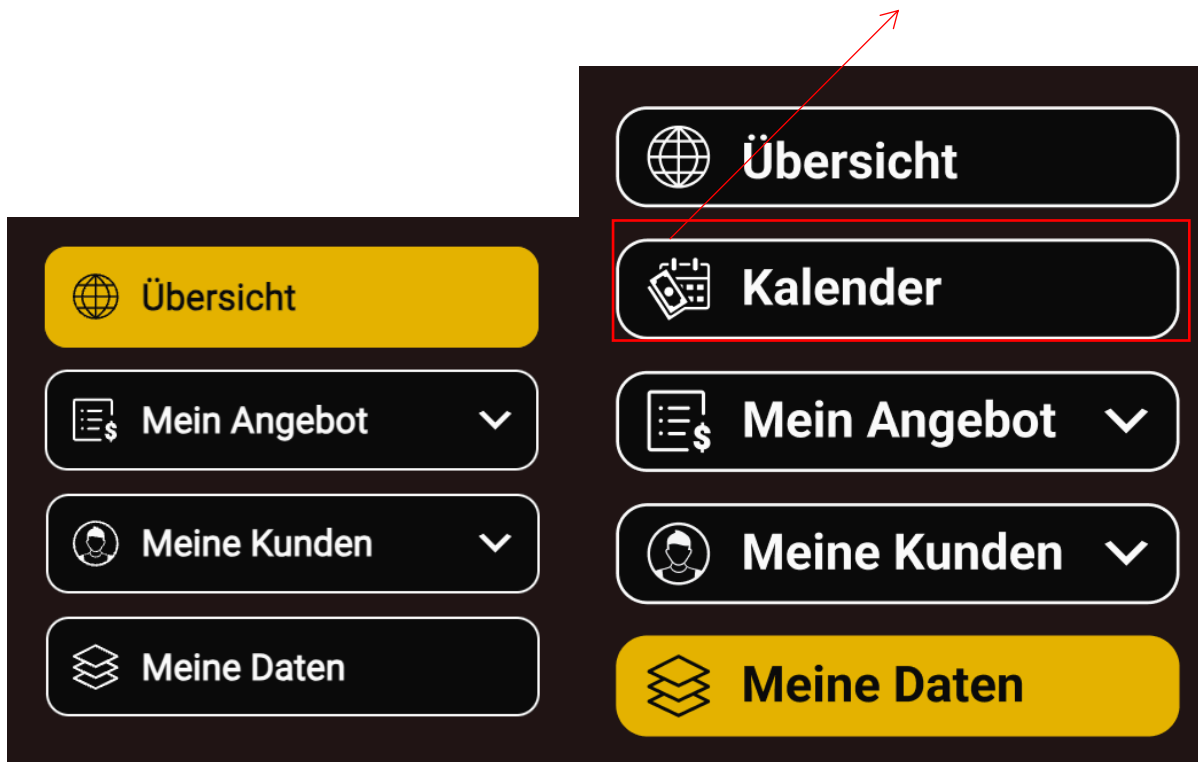

You have 24 hours for this test task.

There is one change in the sidebar which you should do:

Old (open elements):

New (open elements)

Icon link: <https://uxwing.com/payday-icon/>

Old (open elements):
